

## Power distribution and automation

### Impianti & Tecnologie d'Automazione

ITA has three product lines, well distinguished, but complementary to each other:

#### • Power distribution

Low Voltage MCC switchboards with fixed or removable drawers  
Low Voltage Power Center switchboards  
VSD Panels for motors with AC-DC converters

#### • Automation and instrumentation

Automation panels  
Instrumentation systems for automation and control of plants  
Supervision systems  
Integrated process controls  
Remote management

#### • Plant engineering

"Turnkey" solutions for power distribution, automation and instrumentation in the various industrial sectors and areas including those in dangerous zones
